

## Product Information

# Total Playground Management System

### Mapping Tools

- Create Redline
- Zoom in
- Zoom out
- Zoom window
- Zoom to previous
- Zoom to Scale
- Layers on/off
- Imagery support
- Copy to Clipboard
- Bookmark map area
- Select Radius
- Select Polygon
- Create buffer
- Distance Measurement

**Total Playground Management System** developed by **Ennoble Consultancy** is a powerful, easy-to-use solution to enhance playground management. For performing on-site inspection and data collection as well as data management and playground reports generation, it provides an all-in-one package that makes playground management much more effective and efficient than ever.

**EC Total Playground Management System** comprises the use of tablet PC for mobile data collection; **GPS (Global Positioning System)**, for real-time position tracking; and the user-friendly interface and inspection forms, to create the next-generation playground management tool that can't be missed.

### Functionality:

- Graphical Display of playground location, photos and reports
- Production of work record form
- Production of work inspection form
- Ability to assign risk score
- Ability to search in various themes
- Ability to access and analyze data
- Ability to set work priority
- Ability to upload photos and export data
- Ability to send work to field crews
- Ability to inspect and allocate work onsite

To view the application sample, feel free to visit the website:  
<http://hume.ennoble.com.au/PlayGrounds-v3.0/Main.cfm>

To run the application, it is required to have Autodesk MapGuide ActiveX Control installed, which can be downloaded at no expense from the website: <http://www.mapguide.com/>
