Total Playground Management System developed by Ennoble Consultancy is a powerful, easy-to-use solution to enhance playground management. For performing on-site inspection and data collection as well as data management and playground reports generation, it provides an all-in-one package that makes playground management much more effective and efficient than ever.

EC Total Playground Management System comprises the use of tablet PC for mobile data collection; GPS (Global Positioning System), for real-time position tracking; and the user-friendly interface and inspection forms, to create the next-generation playground management tool that can't be missed.
